Chronic Condition Management Plan			
Condition/Problem	Darrell's SMART Goals	Darrell's tasks, required treatments and services	Arrangements and referrals for treatments/services
BMI 41.5 with obstructive sleep apnoea , dyslipidaemia , t2dm	S – Specific: Improve nutrition and achieve sustainable weight loss through an individualised dietary plan for class III obesity, type 2 diabetes, obstructive sleep apnoea, and dyslipidaemia. M – Measurable: Aim for an initial 5–10% reduction in body weight, with improvements in HbA1c, lipid profile, and waist circumference. A – Achievable: Dietitian-led nutrition counselling, meal planning, portion control, and behaviour change strategies tailored to the patient's preferences and lifestyle. R – Relevant: Weight reduction is expected to improve diabetes control, dyslipidaemia, obstructive sleep apnoea, and reduce overall cardiovascular risk. T – Time-bound: Review progress over the next 3–6 months, with regular dietitian follow-up and GP reassessment.		Referred to dietitian
BMI 41.5 with obstructive sleep apnoea , dyslipidaemia , t2dm	S: Physiotherapy for musculoskeletal conditioning and exercise guidance for		Referred to Exercise physio

	obesity-related deconditioning and OSA-related fatigue. M: Improve mobility, exercise tolerance, and achieve gradual weight-bearing activity targets. A: Individualised graded exercise program, low-impact aerobic and resistance training. R: Supports weight loss, glycaemic control, and functional capacity. T: Review progress in 6–8 weeks with ongoing reassessment.
